Chairman's statement

Dear Shareholders

During the first six months of the year the net asset value (NAV) of Alpine Select has increased by 12.6% from CHF 14.86 to CHF 16.73. During the corresponding period the share price increased by 14.5% from CHF 14.67 to CHF 16.80. These figures are adjusted by the distribution of reserves of CHF 2.00 per share from capital contributions.

The positive performance was the result of a strong performance of our core investments Absolute Invest, Absolute Private Equity, HBM Bioventures and Schaffner Holding. These positions represent 86% of our NAV. In addition we continue to receive significant distributions from our CLO portfolio. The Company's liquidity stood at 8% (2010: 11.7%).

During the period we increased our holdings in Absolute Invest, Absolute Private Equity and HBM Bioventures. Based on the solid performance of the underlying assets and the expected narrowing of their respective discounts to net asset value we still expect a significant value creation. Our strategy to alimnet the market with liquidity in Schaffner Holding met with substantial demand. Hence we reduced our position at rising prices to a level we intend to hold going forward.

Under the share buy-back program which started in July 2009 and ended on 4 March 2011, the Company purchased 719'232 shares (or 5.42% of the outstanding share capital). The so purchased shares were cancelled on 30 June 2011 and the outstanding share capital was reduced to CHF 251'184.30 (12'559'215 shares outstanding). The annual general meeting on 18 April 2011 approved a new re-purchase program which may be launched at the discretion of the Board of Directors should the markets warrant it. Under this program up to 10% of the shares of the Company can be purchased.

During the first six months our portfolio has shown remarkable resilience against the general market trends. The international debt crisis, however, will likely have an impact on the performance of our holdings in the future.

Chairman's statement

Subsequent to the reporting period, the Company launched certain private offers for shares in Absolute Private Equity, which did not materialize.

On behalf of the Board of Directors I wish to thank you for your continued interest and trust.

2.4. Financial assets and financial liabilities at fair value through profit or loss

Financial assets at fair value through profit or loss may comprise equity investments, bonds, collective investment schemes, futures, options, warrants, swaps as well as currency forward contracts. Financial liabilities at fair value through profit or loss mainly include futures and options sold short as well as currency forward contracts. For the positions at the end of the reporting period we refer to the investment table under Note 4.

Financial assets and financial liabilities at fair value through profit or loss are initially recorded at their fair value (corresponding to their cost) and are subsequently measured at their fair value. Transactions are recognized on the trade date.

The fair value of investments that are traded in an organized financial market is determined by reference to quoted market prices at the close of business on the statement of financial position date. In estimating the fair value of securities for which no market quotation is available, the Group considers all appropriate and applicable factors relevant to their value, including but not limited to the following: net asset value, results of operations, multiples and discounted cash flow analysis, comparable transactions. The fair values so determined may differ from the values that are actually realized upon the sale of the investments.

All realized and unrealized gains and losses including foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognized in profit or loss. The realized and unrealized gains and losses are calculated based on the weighted average cost formula.

Cash and cash equivalents include cash at banks and short-term deposits with an original maturity of up to three months.

2.6. Furniture and equipment

Furniture and equipment is measured at the acquisition cost less accumulated depreciation and accumulated impairment losses. A straight-line method of depreciation is applied through the estimated useful life of 8 years for furniture and equipment.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements as at 30 June 2011 are not prepared, in all material respects, in accordance with International Accounting Standard 34 *Interim Financial Reporting* and article 14 of the Directive on Financial Reporting issued by the SIX Swiss Exchange.
